

Introducing the Labor Systems Secure Cabinet (LSSecureCabinet)

Developed to eliminate lost pieces of paper, forgotten passwords, lost software activation codes and forgotten email accounts. It has been designed to be easy-to-use, data secure and requires minimal resources. The personal information is stored in an encrypted database which secures the data against information theft.

LSSecureCabinet stores passwords, website addresses and references, software product information and software activation codes. It utilizes a secure database for storage of essential data. Only one password is needed to access all of the data.

Installing LSSecureCabinet places the program and all of it's data in one location which makes it easy to backup. LSSecureCabinet does NOT modify the Windows Registry, does NOT change any system settings, does NOT replace any non-LSSecureCabinet files and does NOT require any additional files from other manufacturers. It is designed to run on Windows 98 SE or higher.

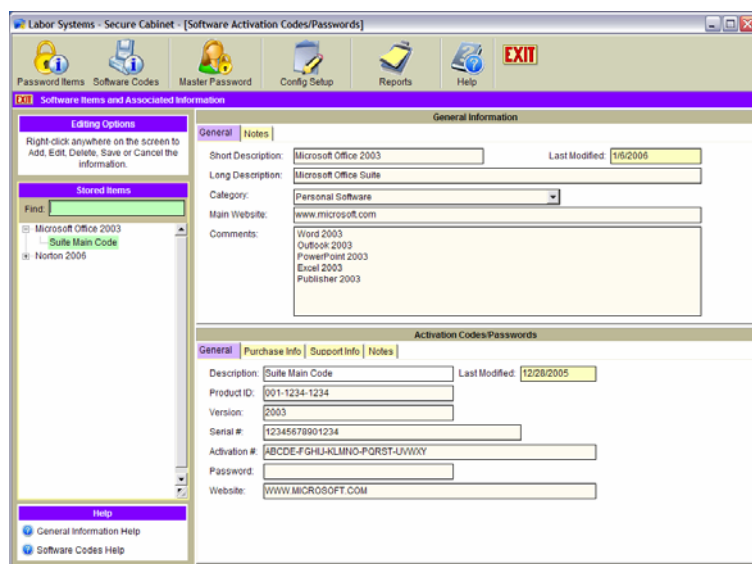

Password Items

Store main password information such as "Personal Banking" and assign all of your passwords needed to access your personal banking information. There is no limit on the number of main Password Items and no limit on the number of Passwords that can be assigned to one Password Item.

Software Items

This stores the vital information for your various software programs. No more looking to find Product IDs or Activation Codes when reinstalling programs. LSSecureCabinet keeps track of all this vital information for you and places it at your fingertips. Additional information can be stored for each software product.

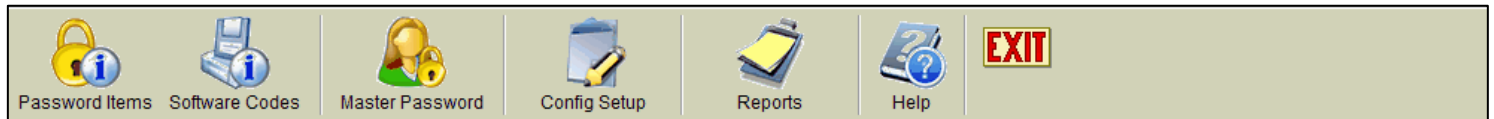

- Purchase Information
- Support Information
- Additional notes for the product

Employee Information Center - Terminal

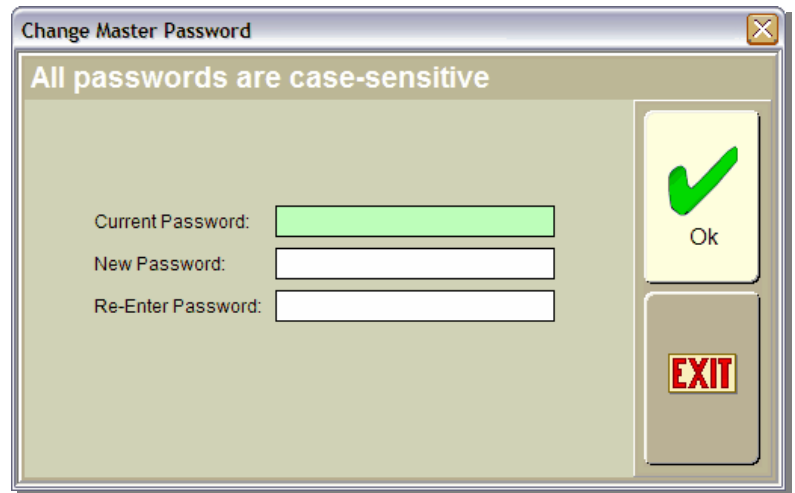

Main Menu Bar

All operations are accessed using only five buttons on the main menu. This makes it easy to use and easy to navigate through your essential information.

Master Password

You can change your Master Password at anytime. You only need to know this one password to gain access to all of your other passwords that you use.

Reports

LS Secure Cabinet provides *List* and *Detail* reports of your personal data. Reports are viewed to screen and can be printed as well.
